Animesh Basak

Lead Frontend Engineer | React, TypeScript, Schema-Driven UI | Frontend Architecture & Design Systems
New Delhi, India | +91-9971340719 | animeshsbasak@gmail.com | linkedin.com/in/animeshbasak | github.com/animeshbasak | animeshbasak.com

PROFESSIONAL SUMMARY

Frontend-focused Lead Engineer with 7.5+ years building high-scale consumer web and mobile products, including the Airtel Thanks app at 150M+ MAU. Leads a squad of 5-7 engineers shipping journeys on a shared schema-driven frontend platform, from HLD/LLD and architect sign-off through delivery and final production review. Specializes in React/TypeScript architecture, schema-driven UI, design systems, micro-frontends, Module Federation, performance, accessibility and testability. Full-stack capable across Spring Boot and Node backends, and a hands-on builder of LLM applications (RAG, multi-model routing, agentic systems). Owns ambiguous problems end to end, across teams.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3
Frontend: React, React Native, Next.js, Angular, Server-Driven UI (SDUI), Schema-Driven UI, Configuration-Driven Rendering, Design Systems, Widget/Component Libraries, Redux, Zustand, Tailwind CSS, shadcn/ui, Framer Motion
Architecture & Performance: Micro-frontends, Module Federation, Monorepos, HLD/LLD, SSR, BFF, Core Web Vitals, LCP, Bundle Optimization, Accessibility (A11y)
Backend: Spring Boot, Node.js, Express, REST APIs, PostgreSQL, Supabase
AI & LLM: Claude Code, Claude, GPT, Gemini, Groq, Ollama, LangChain, LlamaIndex, RAG, Model Routing, Agentic Workflows, MCP, Vector Memory, Prompt Engineering, Evaluations
Testing & DevOps: Vitest, Jest, React Testing Library, Sentry, Jenkins, GitHub Actions, Docker, GrowthBook, Superset, Vercel

WORK EXPERIENCE

Lead Engineer June 2025 - Present
Airtel Digital Ltd. | *New Delhi, India*

- Lead a squad of 5-7 engineers owning React/TypeScript architecture, delivery and release standards across prepaid, postpaid, Airtel One, Black and Self-KYC journeys on the Airtel Thanks app at 150M+ MAU; serve as final production review gate for code quality and regression safety.
- Ship journeys on Airtel's shared schema-driven frontend platform, composing the shared design system and widget library through server-defined schemas and BFF scripts; author HLD/LLD with architect sign-off.
- Lead the Gen4 Self-KYC revamp across prepaid, postpaid and eSIM: a multi-page, schema-driven UI catalog and one unified BFF script family replacing fragmented legacy flows. Phase 1 is live; Phase 2 fixes verified in production.
- Built a conversational, LLM-driven Self-KYC journey in React Native, where server-defined schemas compose native design-system widgets integrated with KYC and verification APIs: document upload, live selfie, DOB correction, referee address and device location.
- Shipped prepaid physical-SIM Self-KYC end to end (OTP verification, resumable orders, cart and payment, post-payment KYC, SIM pairing), the base for corporate-to-retail conversion and the Gen4 revamp; designed in-flight address changes so customers correct an address instead of cancelling.
- Expanded into backend engineering with the broadband team: shipped Spring Boot REST services for DTH address update, order validation and cancellation; own GrowthBook experimentation, Superset dashboards and Jenkins CI/CD, and am accountable for reducing P1 incidents on the squad's journeys.

Senior Software Engineer II, Frontend July 2024 - May 2025
MakeMyTrip India Pvt. Ltd. | *Gurugram, India*

- Improved Lighthouse scores from 6 to 8-9 through SSR tuning, LCP optimization and critical-rendering-path improvements on the hotels booking PWA and desktop web serving 5M+ monthly sessions; worked across micro-frontend, Module Federation and monorepo architecture.
- Resolved a systemic defect generating 1,000+ Sentry errors within 48 hours; built reusable component architecture cutting onboarding time 30% while sustaining 90%+ test coverage with Vitest, Jest and React Testing Library.

Software Engineer October 2021 - June 2024
One97 Communications Ltd. (Paytm) | *Noida, India*

- Led migration from legacy merchant workflows to modern React architecture across journeys serving 3M+ active merchants, with micro-frontends, Module Federation and monorepo-based codebases; optimized Soundbox checkout, contributing to a 40% increase in EDC device sales.
- Built analytics dashboards as Analytics SPOC, lifting merchant engagement metrics 10-15% and enabling faster cross-functional product decisions.

Frontend Developer - Sparklin Innovations (ICICI Bank Nirvana) Jan 2021 - Oct 2021
Systems Engineer - Infosys Ltd. (ANZ Bank, FINACLE) Dec 2018 - Jan 2021

- Built Angular and React modules for ICICI (Nirvana) and ANZ Bank (FINACLE) internet-banking platforms; delivered modular components, API validation, and automation with Postman and WebDriverIO.

PROJECTS

PAARTH (formerly SuperAgent) | *Claude Code, MCP, SQLite, Model Routing*

- Open-source layer around AI coding tools: workflow routing, persistent memory, action checks and cost controls; a rules-only build answers job descriptions on animeshbasak.com.

Trinetra | *Swift, SwiftUI, macOS* | github.com/animeshbasak/trinetra

- Open-source macOS menu bar app that keeps the Mac awake, lid closed included, exactly while AI agents work; agent hooks, a tested decision core and a minimal privileged helper.

EDUCATION

B.Tech, Computer Science and Engineering - Inderprastha Engineering College, Delhi NCR | 2014 - 2018 | 75.4%
